LETTER OF RECOMMENDATION

In December, 2011, I contacted Ron Jackson of South GA Solar about looking at our home in Homerville, Georgia. We had moved into this home a year earlier, and our power bills were very high, particularly in the summer. We had contacted the power company about the power usage, and they had sent a team to analyze our home, but couldn't pinpoint the problem.

Within minutes of inspecting our home, Ron found numerous areas of concern, particularly our air flow, and in our attic. He recommended solar-powered attic fans and a number of other air flow improvements.

When completed, we noticed an improvement in air quality immediately. Our power bills were also lower, without a change in our power usage behavior. This summer, the power bills were considerably lower than the year before. In June and July, our power bill was \$200-300 lower than the previous year. In August, our power bill for 2011 was \$779.96. A year later, after the improvements by South GA Solar and no change in our usage behavior, our bill was \$456.42 – a difference of \$333.54.

To say I was impressed with Ron Jackson and South GA Solar would be a massive understatement. To be honest, I was rather hesitant about utilizing solar power in our home initially, but was rather desperate to get our power bills lower. Ron assured me that he could lower our power bills – and he delivered, big time. We have already recouped our initial investment, and will continue to receive benefits for years to come.

I recommend South GA Solar highly, and will be glad to answer any questions personally about my experience with South GA Solar. My cell phone number is 912-218-2255.

Sincerely,

Allen I. "Len" Robbins, III
